...the sound and music...

...the sound and music...

...and the graphics

...and the graphics

What's left?

Exercise #2

- Simulate a video game using only pencils, index cards and dice.
- Use it as a tool to help understand the game's fundamental design principles.
- Don't sweat the details.

Example Game

- *Tony Hawk's Pro Skater*

The Card Game

Exercise

- Select a digital game
- Make a paper prototype
- What aesthetics survive the change in medium?

Brainstorm

- Name some games to “unplug.”
- Break into groups

Build a Paper Version

- **What To Do**

- Identify your game's play aesthetics
- Choose one aesthetic element to capture
- Write it down and put it in the middle of your table
- Identify the game actions that create that feeling

Build a Paper Version

- **What Not to Do**

- Don't sweat the details
- Don't try to duplicate the whole game
- Don't focus on simulating computer functions
- Don't make a board!

Beta Test at 3:15

*Try to have something playable quickly!
Iterate!*

Beta Test

- Send two testers to other tables.
- Test until 3:45

Discussion

Let's share results.

- What aesthetics did you capture?
- What did you leave out?

The Message

- **Play transcends media.**
 - Mechanics
 - Dynamics
 - Aesthetics
- **Sometimes.**

Using Paper Prototypes

- Good for understanding existing games.
- Use these techniques for games in progress.
- Process is quick and cheap.
- You don't need programmers or artists.

Using Paper Prototypes

- Can't replace actual gameplay testing.
- Can give you a head start and keep you focused.
- Creates a vocabulary to use when discussing your game.
- Can be used as a tool to educate other team members. Have them play, too!
